

## Good to know - The Ulrich natürlich guideline for your Unpackaged store

The following information has to be placed on your detergent packaging in a **clear, legible and indelible** manner:

- name and trade name of your product
- name, trade name, trademark as well as complete address including the telephone Number of the manufacturer who is responsible for distributing the products address, email address and phone number where the datasheet for medical personnel is available
- the packaging of detergents must list the contents according to legal requirements. Furthermore, information for use and special precautions have to be listed if necessary
- detergents and cleaners cannot be filled in food related bottles
- the container has to be labeled with the above mentioned information about the product
- a copied label does not comply since it is not indelible. You can order legally accepted labels on a practical roll printed with or without company imprint from us

The container should not be marked with a waterproof pen. This causes unnecessary use of solvents for removal. In the worst case the container has to be disposed of.

The pump and/or drain valve should be cleaned with hot water.

If goods are delivered with a shipping company, you will receive a cover box with room for 6 x 25 L cans. Do not dispose of this box since it can be used for returning the empty containers.
